Dhiraj Mahajan

Assistant QA Engineer (M2)

Assistant QA Engineer with **2 years of experience** in **manual and automation testing** across **web and mobile applications (Android and iOS)**. Skilled in **Playwright (JavaScript), Selenium (Java), Cucumber, TestNG, and Postman**. Experienced in **functional, regression, smoke, integration, and load testing** across **AI-driven hiring and investment banking applications**, with strong **Agile** knowledge and a focus on software quality.

WORK SUMMARY:

- **2 years** of experience with both **Manual and Automation Testing.**
- **Designed, developed, and maintained** robust automation test scripts for web-based applications utilizing **Selenium WebDriver with Java** and **Playwright**.
- **Implemented and scaled a BDD framework using Cucumber,** creating feature files and step definitions in Gherkin**.**
- **Architected the automation framework** utilizing the **Page Object Model (POM)** design pattern to enhance script reusability and significantly reduce maintenance efforts.
- **Accurately identified and interacted** with complex, dynamic web elements using advanced locators such as **XPath and CSS Selectors**.
- **Executed end-to-end** Functional, Regression, Sanity, and Smoke testing strategies for a highly secure **Investment Banking** project and for AI-driven hiring platforms.
- **Performed mobile testing** on Android and iOS apps, along with responsive testing on web applications.
- **Conducted comprehensive API testing** to validate backend business logic, performing CRUD operations (Create, Read, Update, Delete) utilizing **Postman**.
- **Integrated Extent Reports** into the test framework to generate detailed, visually intuitive HTML test execution reports for the QA and management teams.
- **Systematically reported, tracked, and managed** software defects throughout their lifecycle using **JIRA**, collaborating closely with developers to ensure timely resolution.
- Performed **performance testing using Apache JMeter** to evaluate system behavior, response times, and stability under load.
- **Actively participated** in Agile/Scrum ceremonies, including sprint planning, daily stand-ups, and sprint retrospectives, to align testing efforts with project deliverables.
- **Managed project builds and dependencies** using **Maven**, maintained version history through **Git**, and **maintained basic CI/CD pipelines** using **Jenkins** to schedule and trigger automated test executions.

PROFESSIONAL EXPERIENCE:

Redrob by McKinley Rice | Assistant QA Engineer (M2) | [MAY 2026 - PRESENT]

Cognopi Solutions Pvt. Ltd. | Automation Test Engineer | [JAN 2025 - MAY 2026]

PROJECT DETAILS:

❖ Project 1: Kaabil (AI-Based Hiring and Learning Platform)

Description : An AI-based hiring and learning platform with **Institution, Recruiter and Candidate** modules, available on web, Android and iOS.

Testing Methodology : Functional, Regression, Smoke, Sanity, UI, Responsive, Mobile (Android and iOS), Data and Integration, Billing, Load Testing.

Testing Role : Assistant QA Engineer (M2)

Roles and Responsibilities:

- Tested **assessment, test and learning path** creation, including learning videos, tests linked to each path, and **student management**.
- Tested the **hiring pipeline** (Applied, Interview, Assessment, Hire / Reject), job posting, candidate matching, and attaching assessments to jobs.
- **AI certification and assessment** features and the connection between the Candidate, Recruiter and Institution modules.
- Designed and executed **high-quality test cases** with **99% accuracy,** ensuring comprehensive test coverage, effective defect detection, and reliable software quality.
- **Billing and payment** for student and recruiter plans, and the plan and package flow for reaching recruiters.
- Performed **mobile (Android and iOS), responsive and web** testing, including **regression, smoke, data and integration** testing.
- Wrote **Playwright (JavaScript)** automation scripts and the **load-testing framework** in **VS Code**, and logged defects in **JIRA**.

Tools Used: Playwright (JavaScript), VS Code, Postman, JIRA, Git, Android and iOS devices and builds.

❖ Project 2: People Search (Redrob)

Description : A job and people search platform to find jobs and people, collect and enrich email IDs, and apply or reach out directly by email.
Testing Methodology : Functional, Regression, Smoke, Sanity, UI, API, Responsive, Load Testing.
Testing Role : Assistant QA Engineer (M2)

Roles and Responsibilities:

- Tested the **job search** and **people search** flows end to end.
- Validated **profile data collection and enrichment**, including email ID capture.
- Tested the **outreach** and **direct email apply** flow.
- Performed **web, responsive and mobile (Android and iOS)** testing.
- Ran **regression** and **smoke** testing for releases.
- Wrote and maintained **Playwright (JavaScript)** automation scripts using the **Page Object Model**.
- Wrote the **load-testing framework** in **VS Code** using **Playwright (JavaScript)**.
- Validated APIs with **Postman** and logged defects in **JIRA**.

Tools Used: Playwright (JavaScript), VS Code, Postman, JIRA, Git.

❖ Project 3: Investment Banking Project (Cognopi Solutions)

Testing Methodology : Functional Testing, Regression Testing, Sanity Testing, Smoke Testing.
Testing Role : Automation Test Engineer (Banking Domain)

Roles and Responsibilities:

- Analyzing the **user stories** and communicating with the **BA** and team for a better understanding of requirements.
- Identifying **regression and sanity test cases** for automation, and updating scripts using **POM classes** and **test classes**.
- Creating **feature files, step definition files** and executing the **Runner file**, and generating reports using **Extent Reports**.
- Built the **automation framework** using **Selenium, Cucumber and TestNG**.
- Integrated **Extent Reports** and **Jenkins** for execution.
- Implemented the **POM design pattern** for reusability.
- Performing **Functional, Smoke, Retesting, Sanity and Regression** testing.
- Bug reporting and tracking in the **JIRA** management tool.
- Actively involved in **Agile ceremonies**.

Tools Used: Selenium with Java, BDD Cucumber Framework, Maven as build management tool, Playwright (JavaScript).

EDUCATIONAL QUALIFICATION:

BCA in **Computer Application** from Tilak Maharashtra Vidyapeeth, Pune.
